

HAUTLIEU SCHOOL

Alis Executive Summary 2009

This report summarises the value-added performance for HAUTLIEU SCHOOL in 2009 together with the same data from the previous two years (where it exists). A whole school summary is given along with summaries for each qualification type and details for each subject. More detailed information can be found in the Alis Value-Added Summary and Student Level Residuals reports available online and on h feedback CD. The analysis shown in this report is generated by comparing students in HAUTLIEU SCHOOL to all other students in the Alis cohort (irrespective of the type of school / college that they attend) who studied the same subject in 2009.

The following conventions are used:

- ✓ Green ticks represent above average performance which is statistically significant.
- ✗ Red crosses represent below average performance which is statistically significant.
- o Black circles represent performance that is broadly in line with average.

The number of ticks (✓) or crosses (✗) indicate the size of the effect according to the following scale:

- | | |
|--------------|--|
| ✓ or ✗ | represents a very small effect (ASR <0.2) |
| ✓✓ or ✗✗ | represents a small effect (ASR between 0.2 & 0.6) |
| ✓✓✓ or ✗✗✗ | represents a medium effect (ASR between 0.6 & 0.8) |
| ✓✓✓✓ or ✗✗✗✗ | represents a large effect (ASR >0.8) |

(ASR = Average Standardised Residual - i.e. Value-Added score)

as a rough guide an ASR of 1 represents about a grade, however this is an approximation and the exact equivalence can vary within the range of about $\frac{3}{4}$ - $1\frac{1}{4}$ grade.

The numbers in parentheses indicate the number of results included in the summary. Data from small groups should be interpreted with caution.

Institution Overview:

	2007	2008	2009
Performance across all subjects and students (724)			0

A-Level Summary:

	2007	2008	2009
Performance across all students in all A-Level subjects (561)			0
